

3-Way Deluxe Head & Neck Immobilizer & SuProne Pituitary Board

Durable and versatile positioning devices for head and neck treatments.

Accurate and reproducible positioning is very important when treating tumors in the head and neck region. For this reason many therapists choose the Bionix 3-Way Deluxe Head & Neck Immobilizer and The SuProne Pituitary Board, two of our most versatile immobilization devices. The 3-Way and SuProne Boards are designed to be used in conjunction with low-melt thermoplastic. The boards also allow the patient to be positioned prone, supine or laterally to facilitate set-up and treatment.

- Wider base that provides excellent stability for the patient.
- Easy to set-up in prone, supine or flat positions providing the therapist with a variety of treatment options.
- Multiple calibrations and treatment angles provide treatment flexibility and insure accurate reproducibility throughout the course of treatment.
- Accommodates low-melt thermoplastics for precise positioning.
- Compatible with Timo, Silverman or MoldCare® head and neck supports and prone cushions to provide more comfort to the patient.
- 3-Way Deluxe Head & Neck is 17 ½" wide and 17 ½" long.
- The SuProne is 13" wide and 14 ¼" long.
