

# Extended Butterfly Armboard

*The versatile positioning device for breast, lung and thorax treatments.*

The Bionix Extended Butterfly Armboard is a durable device that comfortably supports a patient's arms during treatment and/or diagnostic procedures of the breast, lung and thorax. The Extended Butterfly Armboard features a one-piece polycarbonate base with an adjustable T-Bar handgrip. The T-Bar offers both vertical and horizontal adjustments for precise patient positioning and maximum comfort.

## Quality

The Extended Butterfly Armboard is fabricated from a  $\frac{3}{8}$ " thick premium polycarbonate to insure durability.

- Height: 6  $\frac{1}{4}$ " wings
- Width: 24"
- Length: 24  $\frac{1}{2}$ "

The Narrow Extended Butterfly Armboard:

- Height: 6  $\frac{1}{4}$ " wings
- Width: 19  $\frac{1}{2}$ "
- Length: 23  $\frac{1}{2}$ "

## Versatile

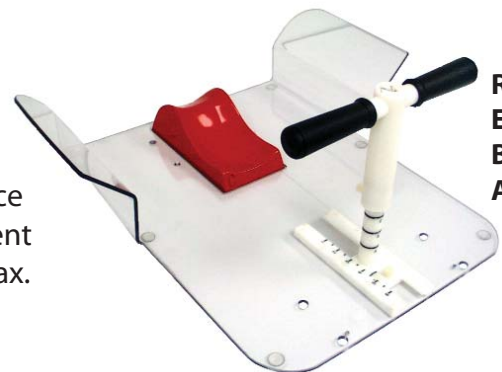

This versatile positioning device can be used with Timo, Silverman or MoldCare® head & neck supports (optional) or for added patient comfort and accuracy you may use a SecureVac™ cushion or SecureFoam™ two-part positioning foam.

The Extended Butterfly Armboard can also be mounted on any of the Bionix Breast or TorsoBoards for patient elevation and stability.

## Service
