

Pelvis/Belly Board PLUS

The versatile positioning device for pelvis and belly treatments.

The NEW Pelvis/Belly Board PLUS from Bionix is made for immobilizing the patient while keeping patient comfort a major priority. This new versatile board can be used prone or supine with different size cushions for the belly opening to better fit your patient's needs. Bionix strategically eliminated target areas that put uncomfortable pressure on the patient, making it difficult to treat. The Pelvis/Belly Board PLUS can be used with thermoplastic for better reproducibility. The new board also features a millimeter scale on the side for easier alignment.

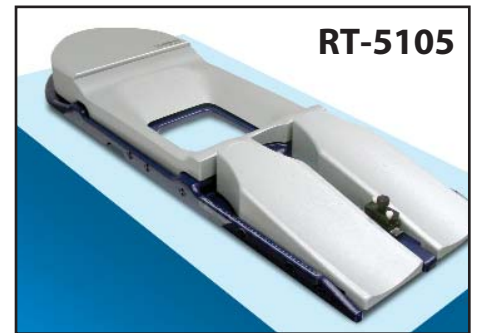

- Allows for supine or prone positioning
- Three different abdomen sizes
- Locks down to most couches
- Ruled edge for better accuracy
- New slider that attaches to thermoplastic and locates between the patients legs
